

"Data Dating", the expo that redefines love in the age of the internet

The exhibition focuses on love relationships in the age of smartphones and social networks.

LIFESTYLE ART

From May 18 to July 7, 2018, Galerie Charlot located in the 3rd arrondissement of Paris, hosts the exhibition "Data Dating".

Through installations, videos and photos by international artists, the exhibition "Data Dating" invites the visitor to explore what love is in the age of the internet. With smartphones, dating sites and dating apps, dating, the ways to flirt, meet and communicate have completely changed. The exhibition aims to question and stimulate debate about these new means of communication that interfere with our emotions and feelings.

This group exhibition fits perfectly in the Charlot Gallery, whose artistic choice resonates with the "Data Dating" project. Indeed, the gallery opened since 2010 "develops a reflection on the relationship between art, technology and science", as it describes on its [site \(https://www.galeriecharlot.com/fr/about\)](https://www.galeriecharlot.com/fr/about).

For more information on the exhibition, it's [there \(https://www.facebook.com/events/139802320068529/\)](https://www.facebook.com/events/139802320068529/).
